*The ITSP service provider listed has been verified in the Panasonic laboratory environment as being compatible with the above listed communications platform. This statement is an acknowledgement by Panasonic System Networks (Europe) that the above mentioned ITSP has been successfully integrated with the listed Panasonic PBX solution in ideal laboratory conditions. Although this statement is not a guarantee that the above mention ITSP will be fully compatible with all implementations of the listed PBX. It does confirm that a reasonable level of compatibility testing has taken place to ensure an acceptable level of compatibility possible. This statement of Compatibility is only valid until the ITSP issues a new version of their service that incorporate new features or functionality or until Panasonic issues a new version of such communications platform that incorporate new features or functionality, whichever occurs first.
